

New Model Introduction

New Model GR-4000 is offered as a replacement for model GC29222Y. Models have common mounting but there are some dimensional differences. And the extended centerline adjustment feature is not compatible with all existing tooling. This has been resolved by reducing the clamping range. We believe the advantages of extended adjustment outweigh any disadvantage of reduced clamping range. See below for wear pad compatibility.

Gen 5 Model GR-4000

- * 2 to 30mm Diameter
- * 6.4 cm2 Piston Area
- * 90° Turn = 0.001mm Adjustment (both axis)
- * +/- 0.200mm Total Adjustment (both axis)
